

Professional Testimonials

Dr. Gerry Ramogida B.Sc., Doctor of Chiropractic- Vancouver CANADA

Working with an NFL team presents numerous types of injuries. The Thermotex infrared pad offers a portable, state of the art modality that provides results fast. From general muscle tension to spasm and edema, speeding recovery from fracture, or aiding in ligamentous repair, Thermotex systems are an invaluable tool utilized on a daily basis to help return players to the field. Thermotex systems also aid in general recovery and prevent injury. In working with Olympic level sprinters, the Thermotex system is utilized both in pre and post workout routines to improve blood flow, aid in metabolic waste product removal from the musculature speeding athlete recovery.

Dr. Ramogida is chiropractor to Seattle Seahawks and numerous international track and field athletes.

Frida Ljungars, SPINA Back Clinic, London, UK

"We incorporate Thermotex as part of our rehabilitation programmes to increase blood flow in the targeted treatment area and to ease muscle spasm prior to treatment. Many patients elect to purchase Thermotex at the end of treatment."

Dr. Jeff Schacter, Doctor of Chiropractic, Calgary CANADA

In my chiropractic clinic, we use Thermotex products daily as a pre-adjustment protocol. We treat almost every patient with Thermotex deep heat prior to adjustment and find that this therapy assists greatly in our treatments. We also make the infrared heat systems available for home use. We have been using Thermotex for 8 years and recommend it highly as a very effective therapy tool.

Vicky Jo Smith CST LDT, Vital Link Health Centre, Polson, Montana USA

About 90% of my clients, who use one of the Thermotex pads that I send home with them to use, purchase it. It helps with the healing process, and gives them pain relief. Most of my clients are back issues, such as spasms, or herniated discs. I also have clients with knee problems and arthritis that have received relief using the Thermotex pad as well.

David Swagar, BKin, RK, Shephard Clinic – Calgary, CANADA

As a Kinesiologist specializing in the rehabilitation of injured soft tissue, Thermotex Personal Therapy Systems have become an integral part of my clinical practice. I use them pre-treatment on all my patients. The increased circulatory effects they provide make the tissues much more pliable prior to using any manual therapy. This makes the treatment easier on me as a practitioner and more comfortable for the patient. Their consistent heat and dual thermostat also make pre-treatment heating much easier and safer than traditional hot packs.

The thing most appealing to me about the Thermotex far infrared system is the therapeutic benefit of the infrared waves. Their ability to improve the cellular metabolism of the injured cells makes it a perfect fit with the Low Intensity Laser therapy that I use as a part of my treatment plans. This provides the patient a method of continuing therapy between sessions, from the comfort of their own home.

I have used these pads on many Olympic and professional level athletes as well as members of the general public, and I am pleased to endorse their use as a means to achieving optimal health.

David Swagar is a soft-tissue rehabilitation specialist working at Shephard Health in Calgary Alberta.

Dr. Natasha Iyer, MD, Calgary Alberta

I have had chronic neck and back muscle stiffness; and frequent headaches. When I use Thermotex, I find that I am much less stiff, and I have an improved range of movement. I also use it when I have a headache or between my acupuncture treatments. The result is great, because I am a nursing mother; and a physician who promotes natural health and healing. Hence, my preference is to avoid drugs of any kind. Thermotex has helped my Dad with an acute back strain to get quick and effective pain relief and rapid healing. My Mother has used it during her bout with pneumonia; and for her arthritic pain. I am now recommending Thermotex to my patients for headaches, for back pains and to improve circulation. Thanks, Thermotex; for helping me move better; and reduce my discomfort from stiff and aching muscles.

Kendal Yonomoto, CPGA Class "A" Professional, Vancouver, CANADA

As a CPGA Class "A" golf professional with a focus on golf specific conditioning I have found the Thermotex to be an effective tool in the management of recovery and recuperation from golf and training. The Thermotex is portable and effective. It can provide benefit to virtually any golfer, recreational or professional.

N. Larsen, Reflexologist, Mesa, Arizona USA

The purpose of Reflexology is to relax tension, improve blood and nerve supply throughout the body, and to increase the ability of the lymphatic system to eliminate toxicity from the body - thus allowing the body to achieve homeostasis. The Thermotex pad magnifies everything I do, thereby giving each client faster and greater results. Their pain is alleviated in fewer treatments, and their general overall feeling of wellbeing is increased in fewer treatments. My clients love the Thermotex!

Dr. Frank Ervolino, Naturopathic Doctor, Florida, USA

Thermotex supports the clinical need to achieve effectiveness in a short time-frame. The infrared pad allows the patient to treat themselves in between clinic treatments which makes great common sense. If you are in pain and you go to see an acupuncturist, the acupuncture treatment relieves the symptoms for 3-4 days. When the patient uses the Thermotex infrared pad between treatments, the benefit of the acupuncture treatment lasts the whole week and the patient gets much better, much faster, and stays that way. Thermotex is a valuable clinical tool in supporting the goal of achieving effective healing.

Testimonials

Bursitis

I have bursitis in both hips. I lay on the Thermotex Platinum System one time and 24 hours later, I had no pain. What a great product!

Myrtle Anderson – California

Arthritis

I feel great comfort from my back pain due to the deep penetrating heat produced by Thermotex. I am very glad that I found this product.

Minoo Antia

Neck Pain

At a time when I was suffering a great deal of neck pain after a car injury aggravated an already existing condition in my neck, I found that the Thermotex Neck decreased the pain so much that I was able to go without pain medication and continue my day to day work as a graphic designer. My neck injury combined with diagnosed osteoarthritis in my neck was making work very difficult and I was very relieved when I could put the Thermotex neck on and have my pain relieved within a short period of time. I do believe it was crucial to overall healing and found the healing process from my injury was much more progressive after using Thermotex.

Barb Jackson

Degenerative Disk Disease

I am not a medical professional, but just from the use of the product I can tell you, and anyone and everyone who will listen, that the Thermotex Platinum pads that I am using in my home and cars is like a miracle to me in relieving the pain I have had from my degenerative disk disease in my upper back, (thoracic area). In addition after having almost breaking my right arm off in a fall and having my elbow replacement done the healing process was much quicker than what the doctors had expected. They had originally told me that it would be a year before I could swing a golf club again it was not much past 6-months that I could hit a bucket of balls. My game is rusty, but it is something that I didn't know I would ever be able to do again.

Lorin Casper

Henderson, Nevada

Spinal Spondylosis

This is the first time I have had pain relief without drugs. The Thermotex pad has made my life better. I love it! We have ordered 4 more as gifts.

Mrs. Muller

Cassville, Montana

Sore Muscles

I had gone trap shooting with my husband, son, and grandson last Saturday for the first time in a few months. Needless to say that I was sore, my shoulder ached, and the muscles from my shoulder to my neck were beyond tight. I took the usual MSM for such a thing and went to bed with my Thermotex pad. I got up once during the night and the muscles were still to tender to touch. But by morning the pain was gone and almost all of the tenderness. I have been using this pad for some time and have had impressive results, but this tops them all!!

Vicky Jo Smith CST LDT

Polson Montana

Back Pain – Spina Bifida

I have had back pain all my life. I was born with spina bifida. My spinal column didn't grow together completely before birth. Since it was all internal, it was not discovered until I was 21 years old and having trouble walking. My back was fused in 1966. The doctor said my back was miserable and I was close to being paralyzed from the waist down.

I went to a number of chiropractors, physical therapists, doctors including The Seattle Bone Clinic at the University of Washington. After x-rays and MRI's they said they couldn't help me. Everyone gave up after a few treatments. I had to use my mind to block out the pain. I always said that I used 80% of my brain to block out the pain. I took 4 tablets of Tramadol HCL 50 mg and 6 caplets of Tylenol Arthritis per day with little or no relief. Tramadol is a narcotic-like pain reliever. I always said my golden years were really pyrite (fool gold). I have considered walking out into the wheat fields around here on a very cold night and just not come back. Heating pads and a Niagara heat and massage chair didn't help.

Now I use my Thermotex pad once a day for an hour. My life is completely different. I have little or no pain. My lawn took me two or three days to mow because of the pain. Last week I mowed my lawn in four hours. I can rototille my big garden and not have terrible pain afterwards. Caring for my 52 rose bushes is a joy. The things I wanted to do in retirement, I can now enjoy. I can ride and care for my horse and not worry about the pain. Thermotex put the gold back in my golden years. Thank you very much.

David Hansel
Albion, Washington

Arthritis - Fibromyalgia

I am so fired up about Thermotex personal systems!!.. I have suffered with fibromyalgia and arthritis for a number of years and my knee pad is working miracles on my knees...in three weeks the pain has decreased dramatically and my pain meds reduced in half!!!! I am only in my fifties, so am thrilled that Thermotex is giving me relief, rather than knee replacement and drugs. I am very thankful and would love to see other suffers get the same relief!!!

Brenda Heise
Victoria, B.C.

Back Spasms

I just have to tell you how grateful I am to have found your products. I have suffered with recurring severe back spasms for 9 years and once they were triggered they would last for days. Even lying in bed and using strong pain medications didn't help much. Now when they occur I can apply the infrared heat and within an hour I can experience significant relief. I highly recommend Thermotex to anyone dealing with recurring or chronic pain. Thermotex has been a life saver for me.

Foot Healing

I have been using your Thermotex device for my recovering heel injury for a couple of months now, and it lives up to its promises and more. I had an open wound on the back of the heel (in office screw removal), and the unit closed it up in only a few days.

Further, it has benefited the healing of soft tissue in the foot and improved its circulation in a way that has practically dissolved the minimal residual joint effusion one gets in situations like this (4 months in casting).

David enjoying his first ride in a long time

Four months imprisoned in a cast with no weight bearing at all returns a weak, tight, foot with shortened gear that cannot do work without complaint, as I am sure you know. I credit the Thermotex device with the surprisingly quick return to walking normally without pain in proper gait. . Typically in calcaneous fracture situations, recovering the ability to walk with pain, limp, swelling and cane occurs in about 6-8 wks. Walking without pain, without aid, without limp or swelling can take up to a year and sometimes more (depending on the injury type and quality of repair). Well, using your infra red system enabled me to walk unaided without pain or limp in proper gain in only 3 weeks, which stunned me, the physical therapist, the orthopedist and my own orthopedist brother, who had forecast a full year to reach anything approaching normal status.

I am sure it's easy for you to understand why I am a confirmed and delighted Thermotex customer!

Again, thank you for making this device affordably available to everyone.
Your product has truly "saved the bacon" here, and I am full of gratitude.

N. Bolen, SW Virginia

Skin Rash

My Thermotex pad was recommended by my Naturopathic doctor for use on a skin rash. After using the pad for 30 minutes in the morning and 30 minutes in the evening for 1 week the rash is 80% gone and NO itching! This product is excellent 10 out of 10.

J. Staruk, Chicago IL.

Shoulder / Elbow Injury

My husband is very happy with the shoulder system. This is the third Thermotex unit we've purchased and we think they're terrific. After five months of not playing tennis and trying all kinds of remedies for tennis elbow I'm back on the courts now, thanks to Thermotex!

D. Kaplan, New York

Back Spasms

I was having painful back spasms until I started using your Thermotex Gold heating pad. They stopped almost immediately. I was a little sceptical, but the infrared heating technology really works. Thanks Thermotex.

Patrick Cech

Knee Pain

We received our Thermotex unit just two weeks prior to a 'scheduled' surgery appointment to get my right knee replaced. My results were pretty rapid, after just 1-2 hours use, I called the next day and cancelled my surgery. Difficult to explain the results, but about 6 years have gone by now and I still have no knee pain.
